## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-58, drawn to a spermicidal composition comprising a gel-microemulsion comprising an oil-in-water microemulsion and a polymeric hydrogel, classified in class 514, subclasses 50, 78, 49, class 536, subclasses, 123.1, 114, class 554, subclass 1+, class 556, subclass 42, class, 564, subclass 17.
- II. Claims 59-61, drawn to a method for inhibiting the motility of sperm, classified in class 514, subclasses 50, 78, class 536, subclasses 114, 123.1, class 554, subclass 1+
- III. Claims 62-73, drawn to a pharmaceutical composition adapted for the topical delivery of a therapeutic agent, classified in class 514, subclasses 50, 78, class 536, subclasses 114, 123.1, class 554, subclass 1+, class 530, subclass 852.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product. For example, other spermicidal composition like Nonoxynol-9 (or N-9) and menfegol can be used to practice the said process.

Art Unit: 1623

2. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
